

WORKSHOP BASE INSTRUCTIONS

We recommend using the following tools (NOT SUPPLIED):

FIXING PACK CONTAINS:

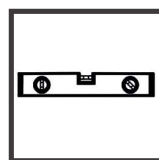

Tape Measure

Pozidrive Screwdriver

Drill & 2mm Drill Bit

Spirit Level

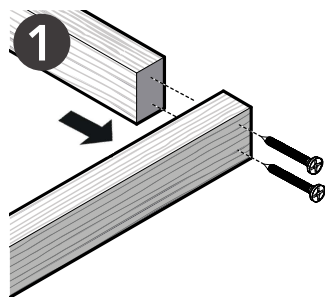

It's vital that you build your new shed base on **level ground** in your desired location.

PLEASE KEEP PLASTIC BAGS AND SMALL PARTS AWAY FROM CHILDREN

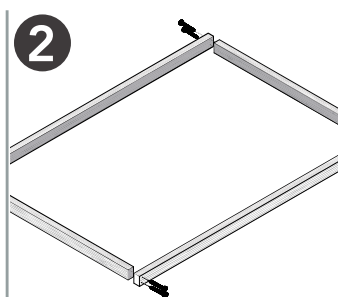

INSTRUCTIONS

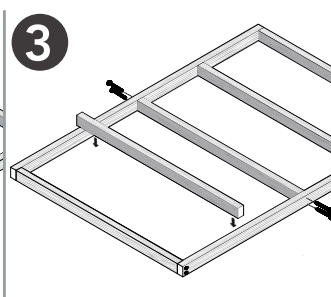

REMEMBER
Always pre-drill before screwing.

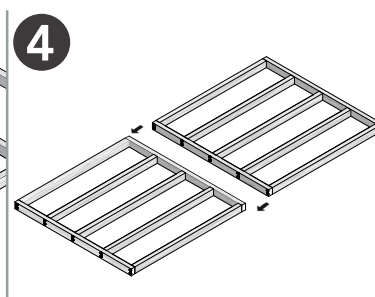

Start at the corners. **Pre-drill and screw through the face of the one timber part into the end of the other.** Use the section layouts below for guidance on positioning.

Repeat this process for the opposite corners to form the overall outer frame. Ensure that all edges and faces of the timber parts are flush.

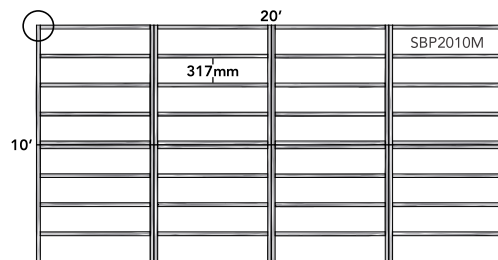

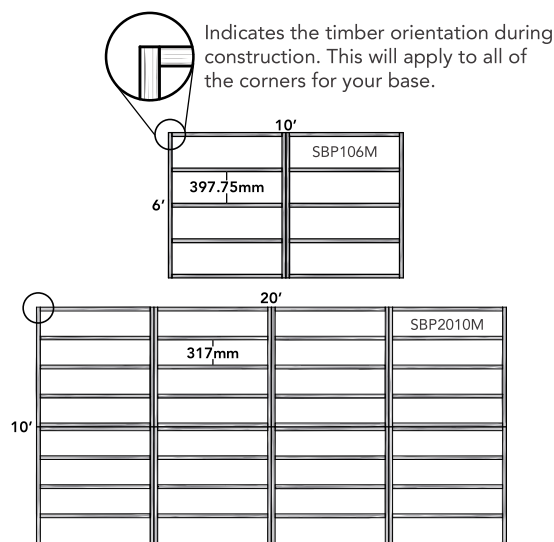

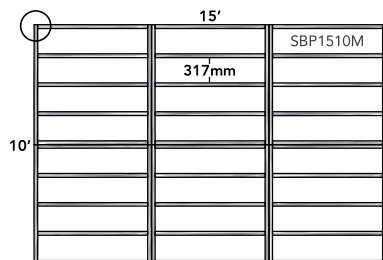

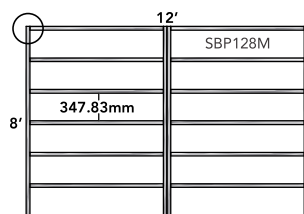

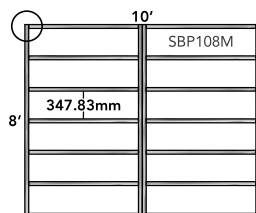

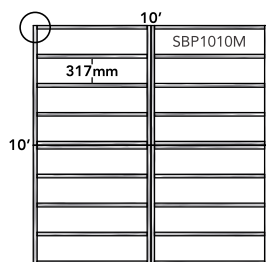

Measure where the central timber part(s) will be placed. Use the measurements from the section layout below for your chosen shed base. **Mark, pre-drill and screw them into place.**

Repeat the first 3 steps for each base you need to construct. Once all individual bases are constructed, **line up the bases in the correct orientation.** Ensure they are flush. Use the section layouts below for guidance on positioning.
